APPENDIX 1 1980 CETA Eligibility Estimates 139

APPENDIX 2 Local Area Unemployment Statistics for Utah's Counties and Cities, 1980 by Month 163

PREFACE

This report, Utah's FY 1982 Annual Planning Information (API), was specifically prepared to provide labor market information needed by organizations involved with the administration of CETA (Comprehensive Employment and Training Act) programs. In addition, because of the wide variety of population and employment statistics contained herein, this report will be helpful to other users of labor market information.

Utah's CETA programs are administered by county or multicounty agencies known as Prime Sponsors. In Utah, there will be five prime sponsors for FY 1982 CETA programs. The areas represented by these agencies are: Wasatch Front South Planning District, Mountainlands Planning District, Weber and Morgan Counties, Davis County, and the Balance of State. This API is arranged in six sections, the State total and one for each prime sponsor jurisdiction. The "Balance of State" section contains six parts, one for each multicounty planning district in that jurisdiction. To expedite preparation and minimize the number of pages in this large publication, this years's API is in the form of a statistical periodical. Its narrative is limited to brief explanatory comments in the introduction.

INTRODUCTION

This report contains a wide variety of information for the state and for each prime sponsor or multicounty planning district. Tables 1 through 5 present population, labor force and unemployment statistics. Since the concepts underlying these figures are fairly well known, they are not reiterated in this report.

Tables 6 and 7 present estimated characteristics of persons eligible for CETA programs. Because CETA definitions and concepts are often abstract, indicators of local CETA-type characteristics are usually scarce. Many assumptions, some bold and some convenient, have been made to prepare the CETA statistics contained herein. Primary sources used are: (1) the 1980 Census Advance Report for Utah containing final population counts with provisional racial breakdowns; (2) Employment Security's population forecasts by age, sex, and race by county for 1981; and (3) Employment Security Automated Reporting System (ESARS) tabulations. Additional CETA information, including eligibility criteria, definitions, and Utah statistics, is found in Appendix 1. This material is a partial reprint of "1980 CETA Eligibility Estimates" prepared by the Institute of Labor and Industrial Relations of the University of Michigan and Wayne State University.

Occupational employment and outlook are addressed in Tables 8, 9, and 10. Tables 8 and 9 present current occupational labor demand and supply and their changes from a year ago as depicted by Job Service job openings and job applicant data. Although not all employers and job applicants use the services offered by Job Service, the information collected provides the best barometer of labor market activity available. Table 10 provides the job outlook by occupation over the 1981 to 1986 period, including a forecast of the annual average number of openings. Additional Utah occupational statistics are available from the Utah Department of Employment Security. Two new publications - - Utah Job Outlook for Vocational-Technical Occupations - 1981 to 1986 (March 1981) and Utah Occupational Employment Projections for 1981 to 1986 (June 1981) - - may be of particular interest. These publications and other occupational information may be requested by calling 533-2396.

The tables introduced in the preceding sketch are provided for the State and each of its planning districts in their respective sections of this report. There are three additional tables in the State section. These contain area data that were more convenient to present all in one table rather than by area. Estimates of the civilian labor force, the unemployed, and the unemployment rate for six "target for service" groups are in Section I, Table 11. "Low income" persons and adults estimates are in Section I, Table 12.

The official 1980 monthly Bureau of Labor Statistics Local Area Unemployment Statistics (LAUS) estimates for each county and many cities of Utah are in Appendix 2. These data were prepared by the Utah Department of Employment Security in February 1981 and submitted to the federal government. They are revised 1980 statistics, which will be further revised in early 1982 utilizing final employer reports and, hopefully, some 1980 census data that may be available at that time.

APPENDIX 1
1980 CETA ELIGIBILITY ESTIMATES

Note: The 1980 estimates were prepared using the Current Population Survey from the United States Census Bureau. They are based on a special tabulation of the March, 1980, CPS. This study is sponsored by the Office of Policy and Planning of the Office of Policy Evaluation and Research of the Employment and Training Administration.

Source: Institute of Labor and Industrial Relations, The University of Michigan - Wayne State University

The Institute of Labor and Industrial Relations (ILIR), working in conjunction with the Employment and Training Administration (ETA) has revised estimates of CETA eligibility and labor force characteristics using the March 1980 Current Population Survey (CPS). These revised estimates should help prime sponsors in planning their activities and in understanding their labor markets. These estimates of CETA eligibility are not strictly comparable to previous estimates since the definitions of eligibility have been slightly modified to produce more accurate information.

The CPS does not ask any questions directly about CETA eligibility. In order to produce these estimates it was nessessary to determine CETA eligibility from the responses to certain questions in the survey. The CPS does not ask questions pertaining to handicaps, citizenship, or prior CETA experience, therefore thes factors were ignored in the determination of eligibility. During a year many more people became unemployed than during a given week. These estimates are based on unemployment during the week, hence they understate persons eligible during a year.

Table Descriptions

Tables containing CETA eligibility and labor force characteristic estimates are available for the thirty largest (as of 1970) SMSA's and Tampa, Florida. Estimates are also available aggregated to the state, regional and national level. Each table is broken down into female, male, black and white populations. The state, regional and national tables also contain a breakdown for metro and remainder populations. Individuals are counted in the metro totals if they reside in an SMSA. The census bureau also does not identify some SMSA's. These are included in remainder along with some SMSA's. The areas are identified in Appendix B.

Tables and entries are not printed in cases where the estimates are not statistically significant. In our estimates of labor force characteristics, we have suppressed any table representing an area with a civilian non-institutional population 16 and over having less than 300,000 people. Row entries within a table have been surpressed whenever the count of non-institutional civilians 14 and over totals to less than 60,000 people. The standard errors are noted in Table 3.*

The CPS Data Base

The CPS data base used to develop these estimates was extracted from the March 1980 Current Population Survey. Non interviewed households and persons, people in the Armed Forces and those under 14 years of age have all been removed from the data base before the estimates were made. The data is currently in a relational data base management system at The University of Michigan. Requests for access to this data base should be addressed to Robert Bressan, Institute of Labor and Industrial Relations, 130 S. First St., Ann Arbor, MI 48104.

---

* *Not available at printing time. Please call Ken Jensen at the Department of Employment Security, Labor Market Information Services (801) 533-2436 to request a copy of this table.*

CETA Eligibility

The following table describes the criteria used to identify individuals eligible for the various titles.

These estimates were prepared under the direction of Malcolm S Cohen, Acting Co-director of the Institute of Labor and Industrial Relations at the University of Michigan and Wayne State, 130 S. First street, Ann Arbor, Michigan 48104.

Questions regarding the estimates contained in this volume should be addressed to Gail Porter, U.S. Department of Labor (202/376-6269).

Metro and remaining areas have been determined by the U.S. Census Bureau. Areas are considered metro if they are within an SMSA with the following exceptions:

- Columbia, MO
- Cecil County, MD
- Spokane, Takoma and Portland, WA
- Central city areas of Eugene and Salem, OR
- The balance of SMSA in Phoenix and Tucson, AZ
- The balance of SMSA in Lincoln and Omaha, NE
- The balance of SMSA in Salt Lake City, Ogden and Provo, Ut
- The entire state of ME
- The balance of SMSA in Providence, RI
- The Balance of SMSA in Honolulu, HA

Respondents in these areas are aggregated with the remainder of state populations. The balance of SMSA refers to those areas in the SMSA that are not in the central city. In addition to these areas, the following states have had the metro and non-metro populations combined and classified as remainder due to the size of their remainder populations:

- New Hampshire
- Idaho
- Montana
- South Dakota
- North Dakota
- Delaware
- Nevada

Appendix A CETA eligibility

Title	Criteria		
IIB, VII	The individual is:		
	Economically disadvantaged	and	CETA-unemployed, or CETA-underemployed, or in school
IID	The individual is:		
	Economically disadvantaged and unemployed 15 or more weeks	or	In a family receiving public assistance
YETP	The Individual is between 16 and 21 years of age (inclusive) and:		
	CETA-unemployed, or CETA-underemployed or in high school or lower grade	and	Economically disadvantaged or has a family income less than 86% of the lower level standard income level (LLSIL)
YCCIP	The individual is:		
	Between 16 and 19 years of age (inclusive)	and	CETA-Unemployed
SYEP	The individual is:		
	Between 14 and 21 (inclusive)	and	Economically disadvantaged
VI	The individual is:		
	Unemployed 10 or more weeks	and	In a family that received public assistance or in a family with an income < 100% of the LLSIL
Any Listed	The individual is eligible for CETA title IIB, VII, IID, YETP, YCCIP, SYEP or VI		
Any Youth	The individual is eligible for Title YETP, YCCIP or SYEP		
Other Listed	The individual is eligible for Title IIB, VII, IID or VI		

Appendix B Data Element Definition

(All income figures are derived from 1979 income averages.
Employment and other characteristics were determined as of March 1980)

Element	Definition
Annual Wage	2080 x total earnings/(weeks worked x hours per week)
BLS-Labor Force	The individual is working, with a job but not at work or looking for work
BLS-Unemployed	The individual is looking for work
CETA-Employed	The individual is either working or with a job but not at work and is not CETA-unemployed, CETA-underemployed or CETA-in-school
CETA-Family Income	Total family income less Supplemental Security Income, public assistance, welfare, veteran's payments, unemployment and worker's compensation
CETA-in-school	The individual is not CETA-Unemployed,CETA-Underemployed, and the individual's major activity is in school
CETA-Underemployed	The individual is part-time for economic reasons, or the individual is full-time and has an annual wage of either less than 71% of the LLSIL or is full-time and has a wage below the poverty level and is not CETA-unemployed
CETA-Unemployed	The individual is looking for work or is part-time for economic reasons and working 10 or fewer hours per week, or is greater than 18 years old and in a family receiving public assistance
Civilian Population	Total interviewed non-Armed Forces, non-institutional population
Economically Disadvantaged	The individual received public assistance, welfare, or had a CETA family income less than the family poverty level or had a CETA family income less than 71% of the LLSIL
Education	Years of school completed
Family Poverty Level	For non-farm individuals: (Family size - 1) x 1220 + 3790 For individuals on farms: (Family size - 1) x 1030 + 3250 Alaska 1.25 x (farm or non-farm poverty level) Hawaii 1.15 x (farm or non-farm poverty level)
FLLSIL	Family lower living standard income level varies from area to area

Data Element Definition

Element	Definition
Part-Time for Economic Reasons	The economic reasons include: slack, work, material shortages, repairs to plant or equipment start or termination of job during the week, and inability to find full-time work. p 55 57
Family Received Public Assistance	The family received SSI, welfare or other public assistance
Hispanic	Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American or other Spanish
SSI	Supplemental security income is made up of payments from federal, state and local welfare agencies to low income persons who are age 65 or older, blind, disabled.
Public assistance	Public assistance and welfare payments include aid to families with dependent children and general assistance.
Unemployment Compensation	These benefits include payments from unemployment insurance, private companies during periods of unemployment and strike benefits received from union funds.
Worker's Compensation	These benefits include any payment from public or private insurance companies for injuries incurred at work. The cost of this insurance must have been paid by the employer and not by the person.
Veteran's Payments	This includes money paid by the Veterans Administration to disabled veterans, survivors of deceased veterans, and subsistence allowances paid to ex-servicemen as GI insurance premiums are also included.
Total Family Income	The sum of the incomes of all family members age 15 and over.
Income	The sum of money received from the following sources: wages, salary, self-employment (farm and non-farm), social security, railroad retirement, SSI, public assistance, welfare, interest, dividends, estates, trusts, rentals, veterans payments, unemployment compensation, worker's compensation, private or government pensions, alimony, child support, contributions and other periodic income.

Data Element Definition

Element	Definition
Family	A group of two or more persons residing together and related by birth, marriage or adoption.
Unemployed for 10 weeks or more	The individual is classified as looking for work and has been looking for a job 10 or more weeks.
Unemployed for 15 weeks or more	The individual is classified as looking for work and has been looking for a job for 15 or more weeks.
Total Minority	Civilian non-institutional population less white non-Hispanic.
Employed full-time	Individual has a job and works 35 hours or more in the last week.
Total earnings	The sum of money wages, salary and net income from farm and non-farm self employment.
Welfare status	The individual received public assistance or SSI.
2 Parent Family	Individual is married with civilian spouse present and resides in a family with related children present. Individual is the family head or spouse.
1 Parent Family	Individual resides in a family with related children present. Individual is family head or spouse and is not classified as married with civilian spouse present.
Other Family Member	Individual is in a family and is not a parent.
Non-Dependent Individual	Individual is not in a family.

APPENDIX 2
LOCAL AREA UNEMPLOYMENT STATISTICS FOR UTAH'S COUNTIES AND CITIES
1980 by Month

Note: These are official estimates prepared for the U. S. Bureau of Labor Statistics by the Utah Department of Employment Security (DES). They are to be used when federal funding will be affected by them. These estimates are revised, but will be further revised in February 1982. The DES also prepares an "Economic Series" of labor force, employment and unemployment estimates for its economic publications and other general purposes.

ADDENDUM

The 1980 racial and ethnic distribution of Utah's population as published in March 1981 by the U. S. Census Bureau is provisional. Selected figures from this publication are presented in each Table 1 of this report and have been used in the computation of some of the estimates in Tables 4, 6, 7, and 11.

From a new Census Bureau release, it has been determined that the "Asian and Pacific Islander" figures in these tables are substantially overstated, while the "Whites" statistics are correspondingly understated for most areas.

This discrepancy occurred because of incorrect narrative accompanying the census statistics. Correct numbers will probably be available in early 1982.
